Date 5.3.1984

APPROVAL OF COLLARS MANUFACTURED BY PRESS LATHING

We refer to your Application for Approval dated 29.4.1983 and would advise as follows:

It is considered that the method proposed for the cold flanging of copper and copper alloy pipes for Class III systems is acceptable. It is noted that after flanging local stress relief is carried out to minimise the risk of stress corrosion cracking.

Yours faithfully,
